- Powerful 5200 mAh Li-Polymer battery pack
- Folds into a compact portable unit
- Rugged, durable and dependable
- Convenient bag for secure transport

Charge Your Thuraya Satellite Phones On the Go
How to charge the built-in battery pack of the Solar Charger

There are two options to charge the battery pack of the device:

**Option A:**

*Power supply from the solar panel:*
Unfold the solar panel and put it in direct sunlight. The solar panel will charge the built-in battery pack.

**Option B:**

*Power supply from a mains socket or USB port:*
Charge the product via an adapter or the USB port of a computer.

How to charge a Thuraya satellite phone

1. Connect your Thuraya handset (XT, XT-DUAL, SatSleeve) with the Solar Charger
2. Switch the Solar Charger on
