INSTALLATION STEPS FOR WINDOWS VISTA / WINDOWS 7

- After the initial attempt to start the client, you might be prompted by Windows firewall asking you if you would like to unblock the client. Please click on "**Unblock**"

GENERAL USAGE

After the completion of the installation process, the user has the choice of either using the client in proxy mode or in a transparent mode which does not require any further user input.

 Proxy mode:

• Go to the proxy settings in your browser and configure localhost:8080 as the proxy

• Locate the client in the start menu and start it by clicking on it

Transparent mode:

• Locate the client in the start menu, do a "right click" on it and select "run as administrator"

On a successful start, a blue tray icon will be displayed.

To stop the application right click on the tray icon and choose "Exit".
