

How to make calls, check emails and access your favourite apps using the SatSleeve

A. MAKE AND RECEIVE CALLS IN SATELLITE MODE

Pair your SatSleeve with the smartphone via Bluetooth:

**1st
STEP**

Go to your smartphone settings – 'Bluetooth' and switch Bluetooth 'on'

**2nd
STEP**

Turn on your SatSleeve and keep the Bluetooth pairing button at the back of the SatSleeve pressed until the SatSleeve shows up under the devices list on the smartphone

**3rd
STEP**

Select the SatSleeve from the list and select OK on the Bluetooth pairing request

**4th
STEP**

Open the free SatSleeve App

You are now ready to make and receive calls in satellite mode.

B. INITIATE A SATELLITE DATA CONNECTION

Once your SatSleeve is paired via Bluetooth, connect to satellite data using Wi-Fi:

**1st
STEP**

In the SatSleeve App, go to 'More'. Select 'Satellite Data' and switch Satellite Data 'on' to establish a Wi-Fi access point

**2nd
STEP**

Go to smartphone settings – 'Wi-Fi', switch Wi-Fi 'on' and select the SatSleeve connection that you have just established

You can now use your preferred browser, check emails, or use apps such as WhatsApp, Facebook, Twitter, LinkedIn and more, via the satellite connection.
